*Quality and sustainable development are the driving forces of all Manuli Hydraulics' activities, with an aim to guarantee worldwide availability of technical and commercial support for it's products and services.*

## An integrated approach

Modern hydraulics applications require robust fluid connector solutions with guaranteed long lasting performance. To that end, Manuli Hydraulics offers a complete range of hoses, fittings and assembly equipment which are designed to work seamlessly together. This harmonised approach allows us to guarantee the quality and performance of hose assemblies in a way that others cannot match.

From design to manufacture and assembly, our commitment to this unified philosophy makes us the global leader in providing integrated solutions for hydraulic connector applications.

# ics Crimping Machines EVO Range

ly machines are part of an integrated product range, designed to ensure users get the best benefits from their Manuli hoses and fittings. The latest evolution of this range are the new es.

Combine the robustness required for harsh environments with the reliability needed for busy workshops. and ergonomic design, along with the ease of set up and maintenance, make them suitable for a variety of This extensive range is highly adaptable, with various options available allowing users to customise their according to their specific needs.

## Safe Crimp Panels

**There are three varieties of Safe Crimp panels available to fit all requirements:**

- **SC panel** - A basic Smart Control panel which includes 2 counters and 3 LED indicator lights. The semi-automatic opening is ideal for serial assemblies as it can be adjusted specifically to allow the fitting to pass through the dies with minimal clearance, reducing the cycle time.
- **SCE panel** - The Safe Crimp Electrical panel includes all of the features of the SC panel, with the addition of an electronic micrometer with the ability to save up to 25 configurations
- **SCS panel** - Safe Crimp System which includes the integration of the Manuli Hydraulics fluid connectors assembling parameters, allowing easy machine set-up and automated quality control of the assembling process for improved production consistency and safety.

## Now Bluetooth Enabled

All EVO range crimping machines with SC and SCE control systems are now also "Bluetooth Enabled" as standard. This functionality is part of Manuli's drive to minimise potential assembly failures by eliminating the prospect of human error in inputting crimp data. As incorrect crimping can lead to catastrophic failure of a hose assembly, this is a prime example of how Manuli is focussed on ensuring the safety and reliability of their products for the end user.

## Ergonomic Table

Specifically designed for the EVO range crimping machines, the ergonomic table provides convenient access and storage for the machine's dies. It also ensures a perfect working height, complete access around the machine and a minimal footprint. Die storage rack also available for direct access to the die sets on the machine.
